

DATOS TÉCNICOS: VALORES PARA LA AMPLITUD DE DENTADOS EVOLVENTE PARA ÁNGULOS DE PRESIÓN DE 20°

Z = nº de dientes de la pieza
Z' = nº de dientes abarcados por el calibre
W = abertura del calibre para el módulo 1
 N.B.: para módulos superiores a 1 es suficiente multiplicar el valor W por el módulo

Z = number of teeth of piece
Z' = number of teeth in gauge
W = opening width of gauge for module 1
 N.B.: for modules in excess of 1, multiply the W value by the module

es.: mod 2.5 Z = 52
 W = 16.9650 x 2.5 = 42.4125 mm

Z	Z'	W	Z	Z'	W	Z	Z'	W	Z	Z'	W
			51		16,9510	101		35,3641	151		50,8250
